NOTICE TO ALL PATIENTS:

In order to avoid confusion, we would like to make you aware that some CPT codes involving a technique called (Strapping/ Taping) depending on the insurance company may reflect a "surgical code". These codes do not mean that surgery was performed or billed but the codes may show up under that category on your eobs.

Strapping refers to the application of overlapping strips of adhesive plaster or tape to a body part to exert pressure and hold a structure in place. Whether it be for the purpose of assisting/facilitating movement or for the purpose of immobilizing an area, for soft tissue treatment of fractures, dislocations, sprains/strains, tendonitis, post-op reconstruction, contractures, or other deformities involving soft tissue. Depending on the purpose of the technique performed different codes are billed. Below are examples of what may be used.

CPT code:

29200	Strapping; thorax	
29240	Strapping; shoulder (eg, Velpeau)	
29260	Strapping; elbow or wrist	
29520	Strapping; hip	
29530	Strapping; knee	
29799	Unlisted procedure, casting or strapping
